

INFORMATION SHEET

1 ABOUT US

We are a newly launched independent statistical consulting firm located in Richmond, B.C.

Our mission is to provide you with expert statistical software training and statistical consulting.

The principal of our firm is Isabella R. Ghement, Ph.D. Isabella obtained her Ph.D. in Statistics from the University of British Columbia in 2005.

2 TRAINING

We provide you with public or private training on various statistical software packages such as R, S-PLUS, SPSS, SAS, JMPIN, MATLAB, etc.

Our training will enable you to attain your data analysis goals as efficiently, timely and stress-free as possible.

We provide you with 30 days of free software-related technical support following your training with us.

2.1 PUBLIC TRAINING

Our public training is typically delivered to you in the form of one-day workshops. Upcoming workshops are advertised on our website, <http://www.ghement.ca>.

Workshops consist of a series of short presentations and demonstrations followed by hands-on, interactive sessions.

As a workshop participant, you will be provided with:

- A desktop computer pre-installed with the appropriate software for use during the workshop;
- A bound copy of the Workshop Notes;
- A CD-ROM containing all examples and exercises used during the workshop;
- Individual attention and a supportive learning environment;
- 30 days of free software-related technical support following the workshop.

2.2 PRIVATE TRAINING

Our private training is typically delivered on-site. We can accommodate both one on one and group training. The advantages of private training include:

- *Customized content and delivery:* Our private training is centered on topics that interest you and is specifically tailored to your skills and needs;
- *Flexible scheduling and location:* Our private training takes place when and where is convenient for you;
- *Value:* Our private training is a time-effective and cost-effective solution that will enable you to better tackle the data projects you are working on;
- *Technical Support:* We offer you 30 days of free software-related technical support following your private training with us.

3 CONSULTING

We offer you statistical consulting advice and, through our own resources or in concert with others, we should be able to handle most of your needs.

In particular, we can help you to:

- Design efficient studies before collecting your data;
- Devise an effective plan for analyzing your data;
- Familiarize yourself with the statistical techniques suitable for analyzing your data;
- Choose the most appropriate software for analyzing your data and learn how to use it to accomplish your data analysis goals;
- Interpret and report the findings of your data analysis.

4 CONTACT US
