## So you have collected your data! Now what?

---

Taming a statistical software package to attain your data analysis goals can be quite daunting and time consuming.

## How can we help you?

---

We provide you with expert training on various statistical software packages, including:

- R
- S-PLUS
- SPSS
- SAS
- JMPIN
- MATLAB

We also provide you with 30 days of free software-related technical support following your training with us.

## How will you benefit from our training?

---

Our training will enable you to attain your data analysis goals as efficiently, timely and stress-free as possible.

## Public Training

---

Our public training is typically delivered to you in the form of one-day workshops.

Upcoming workshops are advertised on this website.

Workshops consist of a series of short presentations and demonstrations followed by hands-on, interactive sessions.

As a workshop participant, you will be provided with:

- A desktop computer pre-installed with the appropriate software for use during the workshop;
- A bound copy of the Workshop Notes;
- A CD-ROM containing all examples and exercises used during the workshop;
- Individual attention and a supportive learning environment;
- 30 days of free software-related technical support following the workshop.

## Private Training

---

Our private training is typically delivered on-site. We can accommodate both one on one training and group training.

The advantages of private training include:

- *Customized content and delivery:* Our private training is centered on topics that interest you and is specifically tailored to your skills and needs;
- *Flexible schedule and location:* Our private training takes place when and where is convenient for you;
- *Value:* Our private training is a time-effective and cost-effective solution that will enable you to better tackle the data projects you are working on;
- *Technical support:* We offer you 30 days of free software-related technical support following your private training with us.
